1b Testing

- Listening: Section 1: Notes completion
- Language development: Present simple with adverbs of frequency; *can* for ability, possibility and permission
- Vocabulary: Higher education
- Reading: Short-answer questions
- Writing: Task 2: Advantages-disadvantages essay
- Speaking: Part 1: Introduction and interview

Are you an early bird or a night owl?

We asked 100 people, 'At what time of day do you feel most productive? Most creative?'

63

Percentage of people who feel most productive in the morning

72

Percentage of people who feel most creative in the morning

productive = making things in large quantities or producing a good result

creative = using imagination to produce new ideas or things

Lead-in

Discuss the questions.

- 1 Look at the infographic. At what time of day are people:
 - most productive? • least productive? • most creative? • least creative?
- 2 At what time of day are you most/least productive? Most/Least creative?

Reading (Short-answer questions)

Before you read

- 1 Work in pairs and discuss the questions.
- 1 Do you think you are a good learner? Why/Why not?
 - 2 Do you think good learners share particular characteristics? If so, what characteristics are typical of good learners?

Find specific information

- 2 Read the passage quickly and choose the correct answers.

- 1 What is the purpose of the passage?
 - A to give instructions
 - B to give an opinion
 - C to give advice
- 2 Who wrote the passage?
 - A a student
 - B a psychologist
 - C a teacher

- 3a Read the passage again. Match these key ideas (1–5) with the paragraphs (A–E).

- 1 Good language skills are important.
- 2 Study can sometimes be boring.
- 3 Good learners always have new questions.
- 4 Good learners think about their studies in their free time.
- 5 Good learners realise there is a link between new and old knowledge.

- b Read these questions about the passage and underline the key words. Then compare with a partner.

- 1 What do good learners never stop trying to do?
- 2 How do good learners feel about their chances of finding the answer to a study problem?
- 3 What makes doing boring learning tasks worthwhile?
- 4 What do good learners modify as they learn more?
- 5 Who can good learners explain new knowledge to in an appropriate way?

- c Match each question in Exercise 3b with the kind of information you need to find.

- A a person or people _____
 B an activity or a thing _____
 C a feeling _____

- d Work in pairs. Look at question 1 in Exercise 3b and follow these steps to answer it. Use no more than three words in your answer.

- 1 Which part of the passage contains the answer?
- 2 What is the correct answer?
- 3 Which words in the passage reflect the words in the question (*never stop trying to do*)?
- 4 Check the number of words. If there are more than three words, what can you leave out?

Test training

- 4 Answer questions 2–5 in Exercise 3b. Follow the steps in Exercise 3d for each question. Remember that you should:

- use no more than three words in each answer.
- use only words from the passage.

Task analysis

- 5 Work in pairs and discuss the questions.

- 1 How did reading the whole passage first help you to find where the answers were?
- 2 Did the questions follow the order of the passage?
- 3 Which words in the questions helped you understand what to look for?
- 4 Do the key words in the questions repeat the words in the passage?

Discussion

- 6 Work in pairs and discuss the questions.

- 1 Which of the characteristics in the passage do you already have?
- 2 How do you think you can help yourself to become a better learner?
- 3 Which of the characteristics in the passage do you think are important for students studying English? Are there any other characteristics that you think are important?

Who makes a good learner?

An experienced university teacher has put together a list of the psychological characteristics that good learners have.

- A** Good learners are curious. They wonder about all sorts of things. They love the discovery part of learning. Finding out about something gives them an intense satisfaction. But their curiosity is addictive, so they always want to find out more.
- B** Good learners work hard. A few things may come easily to learners, but most knowledge requires effort and good learners are willing to put in the time. They talk with others, read more, study more and carry around what they do not understand, thinking about it before they go to sleep, at the gym, on the bus. Good learners are persistent. When they fail, they carry on, confident that they will figure it out eventually. In the meantime, they learn from their mistakes.
- C** Good learners recognise that learning is not always fun. But that does not change how much they love it. Understanding the topic, when they finally get there, makes it all worth doing. But the journey to understanding is not generally all that exciting. Some learning tasks require boring repetition; others a mind-numbing attention to detail; still others involve periods of intense mental focus.
- D** Good learners make knowledge their own. This is about making the new knowledge fit with what the learner already knows. Good learners have to change and adapt their knowledge structures in order to make room for what they are learning. In the process, they build a bigger and better knowledge structure. It is not enough to just take in new knowledge. It has to make sense, to connect in meaningful ways with what the learner already knows.
- E** Good learners share what they have learned. Unless knowledge is passed on, it is lost. Good learners love sharing what they have learned. They write about it and talk about it. Good learners can explain what they know in ways that make sense to others. They are not trapped by specialised language. They can find examples that make what they know meaningful to other learners.

Writing (Task 2)**What's in an essay?**

- 1 Choose the correct answers. You must choose more than one option in two questions.
 - 1 What is an essay?
 - A a description of an event or experience, giving a personal view
 - B a piece of writing about a particular subject, usually with the writer's own opinions
 - C a piece of writing that gives facts and details about a situation or an event
 - 2 Who might we write an essay for?
 - A a friend or relative
 - B an unknown audience
 - C a tutor or lecturer
 - 3 Which of the following do you find in an essay?
 - A an introduction
 - B a conclusion
 - C a main idea
 - D lots of difficult vocabulary

- 2a Read the writing task and underline the key words. Then choose the correct answer in the question below.

Many students work while they are studying.
What are the advantages and disadvantages of working while you study?

What do you need to write about?

- A the difficulty of studying
- B how study prepares you for work
- C working and studying at the same time

- b Work in pairs. Follow the steps below.

- 1 Think of one advantage and one disadvantage you could include in your essay.
- 2 Discuss your ideas with another pair.
- 3 Read the model answer. Does it mention any of your ideas? What other advantages and disadvantages does it mention?

Going to university can be very expensive and so many students decide to work while they are studying.

The main advantage of working while studying is earning money. A salary allows students to pay for their living accommodation, their food, their books and their fees. As a result, they do not need to borrow money from the bank or from their parents. Another advantage is that it gives students experience of working. This looks very good on their CV when they leave college.

One disadvantage is that it is hard to work at the same time as studying. Work can make people feel very tired, and this means it is difficult for students to make themselves read a textbook or work on an assignment when they get home after work. Another problem is that having a job means there is simply much less time available for study. Working students may not be able to complete their assignments as well as full-time students and so get poor marks.

Overall, in my opinion, it is a good idea to work and study at the same time. Working gives students valuable experience, which makes it easier for them to find a job afterwards. However, they need to be very good at organising their time so they can still read all the books on their reading list and hand in well-written assignments.

Introduce advantages and disadvantages

- 3 Look at the phrases in the box for introducing advantages and disadvantages. Which ones does the student use in the model answer?

One advantage/disadvantage is ...

The main advantage/disadvantage is ...

Another advantage/disadvantage/problem is ...

- 4 Write sentences for the essay about the advantages and disadvantages of working and studying at the same time. Use your ideas from Exercise 2b and the phrases in Exercise 3.

Task analysis**Discussion**

International survey of business courses

A recent international survey of business degrees shows that business and related subjects – such as accounting and economics – are among the most popular courses at universities worldwide. Students say that they choose these courses because business has an impact on almost every aspect of modern society. They also believe that a business degree makes it easy to find a job. Business graduates often earn a good salary although very few of the students in the survey give that as their reason for studying business.

The term 'business degrees' includes a wide variety of courses; some are specialised and others are more general; some are very academic and others focus on practical professional development. There are also different levels of degree. Most business students are undergraduates. However, there are also large numbers of business students on post-graduate courses. Professional qualifications such as MBAs are only for people who already have some business experience.

The study shows that all types of business degree look at both theory and practice. Of these two parts of a course, the theoretical aspect is less popular with most students although all agree that it is an essential part of a good degree course. Students look at practice

through case studies, problem-solving tasks and project work. They also often have the chance during their course to spend a period of time – typically three months but it can be up to one year – actually working in a company.

The survey also shows that the majority of students plan to go into a career in business. There are, of course, many different types of business career. Only a relatively small percentage of students plan to set up their own business. Some aim to work in finance departments, others in advertising and still more in sales. Human resources and business consultancy are also options which some graduates consider.

A few students who study business decide that it is not after all the career for them. However, their degree is still a very useful qualification. The international survey also reports on interviews with a range of employers. These say they like the fact that business graduates are excellent team workers and can present information well both in writing and in front of an audience. These are valuable skills in all workplaces. The survey concludes that choosing to study business can be a very good decision.
